

## **Team Member for a Startup in Medical Technology for Lung-Based Diseases**

We are looking for active team members to support our pre-seed funded startup related to an active immunity-inducing medical technology for lung-based diseases such as lung cancer, or other chronic diseases.

The prospective members will have a chance to be a part of a team, who are on an active track in the European Innovation Council accelerator program, where the total allocated funding is around 17M€.

As a team, we are looking for co-founders, who have profound knowledge of clinical validation and testing in biotechnology, medical technology, and healthcare.

In 2023, we are planning to apply for Existency Gründerstipendium as a preliminary step towards our innovative aim as a kick-off.

Anyone who is interested in and wants to be a part of a promising idea please contact:
